

MW&A exploration of major periods of a solar parameter vs. major periods at streamflow gages of current interest

Data sources
<http://www.sidc.be/silso/datafiles>

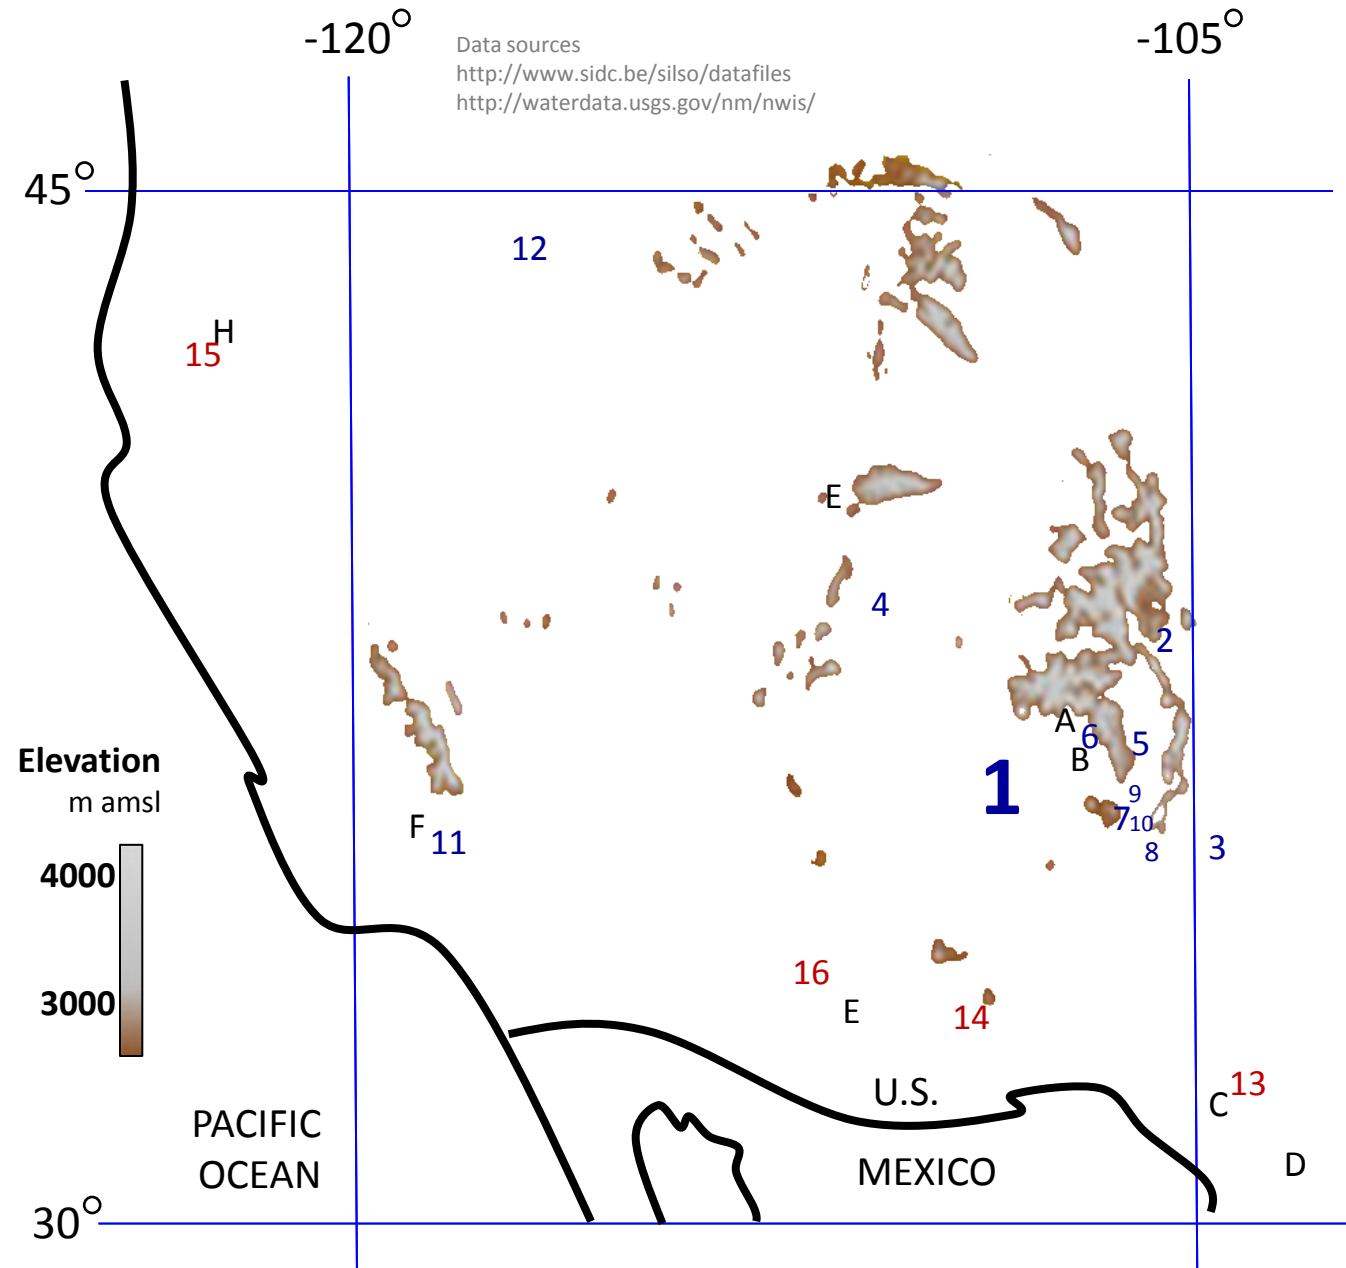

MW&A applies our unique approach, grounded in best stochastic hydrologic practices, in producing these forecasts, and in analyzing past forecasts and forecasts by others. MW&A makes no further representations on forecast performance or accuracy. Buyers are cautioned and advised to treat all hydroclimatologic forecasts as exercises which although based on quantifiable data, are nonetheless subject to extensive uncertainty.
